## SUMMARY

As a skilled **Database Administrator**, I bring expertise in both frontend and backend technologies, with a strong focus on database management and optimization.

My proficiency in **SQL** and **NoSQL** technologies, including **MongoDB**, **PL/SQL**, and **T-SQL**, allows me to effectively design, implement, and maintain complex database systems. I am experienced in managing large datasets, ensuring data integrity, and performing performance tuning and optimization.

Additionally, my backend knowledge in **Node.js**, **Python**, **Java**, and **C++** enables me to develop and manage server-side applications that seamlessly interact with databases. With a strong foundation in **Shell scripting (Bash)** and **SQLAlchemy**, I am skilled in automating tasks, creating efficient database queries, and improving operational workflows.

My combined skills in **frontend technologies** like **HTML**, **CSS**, **JavaScript**, and **Bootstrap** also allow me to collaborate effectively with development teams to ensure smooth integration between databases and user-facing applications.

## EDUCATION

### Bachelor of Science in Computer Technology

Minor in Computer Technology • KG College of Arts and Science • Coimbatore, TamilNadu, India • 2026

## COURSEWORK

### 250+ Coursera courses

KG College of Arts and Science • 202520 • Individuality  
• Improving my Knowledge and Skills regarding my subjects.

## SKILLS

### Frontend Languages & Technologies:

- HTML
- CSS
- JavaScript
- Bootstrap

### Backend Languages & Technologies:

- JavaScript (Node.js)
- Python
- Java
- C++

### Database Languages & Technologies:

- SQL
- NoSQL
- MongoDB
- PL/SQL
- T-SQL
- NewSQL
- Shell Scripting (Bash)
- Python (SQLAlchemy)
